DETAILED ACTION

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

1. Claim 15 is rejected under 35 U.S.C. 102(e) as being unpatentable by Hamano et al. (US Patent Publication 2002/0063961).

Regarding claim 15, Hamano (figure 16) is interpreted as disclosing a zoom lens system comprising, in order from an object: a first lens group **L1** having positive refractive power, a second lens group **L2** having negative refractive power, a third lens group **L3** having positive refractive power, and a fourth lens group **L4** having positive refractive power, wherein each of the first lens group through the fourth lens group moving such that when the state of lens group positions varies from a wide-angle end state to a telephoto end state, a distance between the first lens group and the second lens group increases, a distance between the second lens group and the third lens group decreases, and a distance between the third lens group and the fourth lens group decreases (paragraph 0325), the third lens group including at least two sub-lens groups **FL** and **SL** having positive refractive power, an image being shifted by moving either of the two sub-lens groups as a shift lens group perpendicular to the optical axis (see figure).

Allowable Subject Matter

2. Claims 1-14 and 16-28 are allowed. The following is a statement of reasons for the indication of allowable subject matter. The present application relates to a zoom lens system and in particular to a high zoom ratio zoom lens system capable of shifting an image. Regarding claim 1, the prior art fails to disclose that the conditional expression $0.120 < DT/ft < 0.245$ is satisfied. Regarding claim 16, the prior art fails to disclose that the conditional expressions $0.05 < Ds/fw < 0.7$ and $0.1 < ft/fA < 1.5$ are satisfied. Regarding claim 28, the prior art fails to disclose that the conditional expression $0.05 < Ds/fw < 0.7$ is satisfied. The claimed invention is therefore considered to be in condition for allowance as being novel and non-obvious over prior art.

3. The prior art taken either singly or in combination fails to anticipate or fairly suggest the limitations of the independent claims, in such a manner that a rejection under 35 USC 102 or 103 would be improper. Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
